[DeelakaDias](#)

[Deelaka Dias](#)

A motivated Data Science graduate with First Class Honours from the Informatics Institute of Technology (affiliated with Robert Gordon University, Scotland), with hands-on experience in machine learning, predictive analytics, and deep learning. Proficient in Python, Java, and C#, and passionate about applying AI-driven solutions to real-world problems. Currently seeking a full-time role to contribute to and grow within a forward-thinking AI or Data Science team.

Work Experience

Intern - Automation Engineer (For Final Year Project, July 2025 - April 2026)

MAS Holdings Pvt Ltd - Activewear Campus

- **Predictive Maintenance using Deep Learning and IoT Sensor Data**

- Developed a two-stage deep learning pipeline using a novel Frequency-Aware Gated Temporal Fusion Transformer (FAG-TFT) that processes IoT sensor data through frequency-grouped Gated Residual Networks with dynamic attention weighting, enabling real-time fault prediction and multi-class breakdown classification for industrial sewing machines, benchmarked against LSTM and GRU baselines with live Azure SQL integration for continuous factory floor monitoring.
- Tech Stack- python, RNN, TFT, LSTM, GRU, C#, GIT

Intern - Business Intelligence Consultant (July 2024 - June 2025)

Fortude

- **Cost Tracker App**

- Built a Power Apps data entry interface with Power Automate validation workflows to track monthly operational costs across four departments, surfaced through a real-time Power BI dashboard for management reporting.
- Tech Stack- Power Apps, Power Automate, Power BI

- **RAPID Chatbot**

- Developed a conversational AI assistant for the RAPID ERP system using RAG, where user manual PDFs were chunked, embedded using OpenAI embeddings, and stored in ChromaDB for retrieval, integrated GPT with history-aware retrieval, session memory, and prompt engineering to deliver accurate, context-grounded responses strictly within the RAPID knowledge base.
- Tech Stack- python, Langchain, Langsmith, OpenAI, ChromaDB, Flask, SharePoint, GIT

Projects

- **Character Classifier - Recurrent Neural Network (2025)**

- Created a pipeline for character-level classification and language modeling using RNNs, including models for consonant-vowel classification and language modeling. The files handle model definitions, training, validation, and log probability computations.
- Tech stack - python, TensorFlow, Keras, Numpy, Matplotlib, GIT

- **Authorship Attribution through Machine Learning and Stylometry (2024)**

- Built an Authorship Attribution system supporting both English and Romanized Sinhala text, applying stylometric techniques including POS tagging, n-gram analysis, type-token ratio, and cosine similarity with Random Forest and LSTM models to classify whether an unknown piece of text belongs to a specific author, with a novel focus on Romanized Sinhala an area previously unexplored in authorship attribution research.
- Tech stack - python, NLTK, Keras, TensorFlow, scikit-learn, spaCy, GIT

Education

- **Informatics Institute of Technology (Affiliated to Robert Gordon University Aberdeen, Scotland)** 2022-2026
 - Bachelor of Science (Honours) Artificial Intelligence and Data Science - First Class Honours
 - Machine Vision
 - Data Engineering
 - Deep Learning
 - Machine Learning
 - Artificial Intelligence
 - Object Oriented Programming
 - Web Technology
 - Advance Mathematics
 - Data Structures and Algorithms
 - Edge AI
- **Royal College Colombo 07** 2008-2022
 - GCE Advance Level Examination (2021)
 - 2B & 1S passed in Physical Science stream
 - GCE Ordinary Level Examination (2018)
 - 8A & 1B

Certificates

- **LinkedIn Learning**
 - Microsoft Power Platform Fundamentals
 - Analyzing and Visualizing Data with PowerBI
 - React.js Essential Training
 - Flask Essential Training
- **IEEE Computer Society Student Branch Chapter of IIT**
 - CODESPRINT 8 (Hackathon)
 - CODESPRINT 7 (Hackathon)
- **Mystical Rose International Institute**
 - Advanced Certificate in Spoken English
- **ESOL Premier Campus**
 - C1 Advanced - Proficiency in English across all four language skills

Skills

- | | | | |
|----------|-------------|------------|------------------------|
| • Python | • Flask | • OpenAI | • Power Automate |
| • Java | • LangChain | • Azure | • Power BI |
| • R | • LangGraph | • AWS | • Power Apps |
| • C# | • RAG | • ChromaDB | • Power Virtual Agents |

Extra Curricular Activities

- **Rotaract Club of Informatics Institute of Technology**
 - EcoBrick 2023 - Treasurer
 - Parallax 2024 - Treasurer
- **IEEE - Member**
 - Industry Outreach 2024 - Volunteer
 - CodeSprint 8.0 - CyberCrew
 - CodeSprint 7.0 - DRUPL
- **IIT Toastmaster - Member**
- **Senior Cadet of College Air Cadet Platoon (2019-2021)**
 - Hermann Loos Challenge Trophy- 2019
